

RECYCLING

CARTON CONTAINER

WHITE GLASS CONTAINER

COLOURS GLASS CONTAINER

PAPER CONTAINER

PLASTIC CONTAINER

PAPER CONTAINER

- In the Czech Republic blue container is used
- Paper suitable for recycling is office paper, books, newspapers, magazines, flyers, boxes, cartons and cardboard.
- Recycled paper —————> toilet paper and paper, such as notebooks, calendars

PLASTIC CONTAINER

- Plastics are made into different products
- Plastic bottles are changed into toys for children or some clothes, parts of shoes and covers for books)

GLASS

White glass

Coloured glass

- At the beginning recycling it's a bottle of wine (coloured or white) and the end it's still a bottle.
- Cups, glass ornaments are also made from recycled glass.
- **CORRECT CLASSIFICATION OF GLASS IS VERY IMPORTANT in Czech Republic!**

METALS CONTAINER

- Recycling may be repeated continuously.
- It is very DANGEROUS and we must be very careful when we are working with metals (aluminium, iron = they are the most dangerous!)

DANGEROUS WASTE

- For example there are batteries.
- In Czech Republic – We return unused medicine to the pharmacy.
- Old fridges, cookers or microwaves and electrical appliances are transported by special service and recycled

CLOTHES

- We have a special container for clothes and shoes.
- These clothes are recycled to other kind of clothes.
- And we can give our old clothes to charity in our town.

BIOLOGICAL WASTE

- In the villages people recycle biological waste themselves – They have COMPOST (dead leaves, manure, moldy fruits or vegetables...)
- Some smaller towns have a special servise that recycle compost.
- And big cities have problems with recycling biological waste.

COMPOST IN THE VILLAGES

**SMALL
COMPOSTER
IN THE
TOWNS
OR GARDEN**
